no matter how improbable, must be the Truth. (Sherlock Holmes)

Neil & I, ruminating in the Ivory Tower at 36½ Union St, became particularly entranced (in an otherwise lady-like missive from Pennsylvania) by the off-hand, last-minute, but none the less outraged, description of the current occupant of 1600 Pennsylvania Avenue:

.... as for that nincompoop in the White House ....

Obviously frustrated well beyond her elastic limit we hope the following historical review will act pacifically.

Dear Hildegarde:

As a sculler we're quite accustomed to observing the past in order to scull thru the proper arch of the bridge ahead. By reviewing PWM's, the Professional War Machine's, past performance perhaps we can help you see the candle-light in the tunnel ahead. PWM has dominated the Executive Branch's thinking since WWII; (our continuing Conspiracy & Coverup does not go back to ... cont'd on p. 3

GKG friends, and foes:

1) Salut to those who have paid $10 and are exempt - proceed to page 3...
thankyou

2) to those on the Complimentary List
+X on mailing label and green check mark page 2 +
who want to continue or not....
please let us know (a few have: TKS)

3) to those on the Pay-as-you-Go List
before going to page 3 tear this sheet out and send it in with your $10 - or with your refusal to continue —
cut-off is III/31/83 — thanks

ps: if you were giving a party you'd like to estimate the number of cases of champagne — ± 5 or so - please help with our copies to be printed

MILITARY LEADERS WOULD RATHER CUT ARMS, NOT SALARIES

Column 6
Front Page

we thank the Times for spot-lighting Nincompoopsia so bravely....

WERE NOT ASKED, THEY SAY

Joint Chiefs Are Unhappy With Weinberger's Preference, Air Force General Says

NY Times · II/14/83

San Juan Hill and/or Gettysburg). During our 50-year span there are Two breaks in PWM's control: from inauguration '61 to '63 (Dallas) and from inauguration '77 to '79 (Afghanistan).
PWM's control carried with it a natural corollary: the job description for the Chief Executive, the front man for Media's Soaps. Precisely as you blasphemed so beautifully: Nincompoop is the description.
Each President who did not measure up was assassinated: Kennedy was murdered; Johnson chose to step down; Nixon was "impeached"; Carter became a born-again warrior; recent dissent almost cost us another President. Note that political assassination does not require a dead politician.
If the accompanying headline is an indication, Nincompoopsia, a contagious affliction, has infected the enforcers of the original script.
Take heart Hildegarde... we're gaining... cheerio NW

GKG·3·11/83

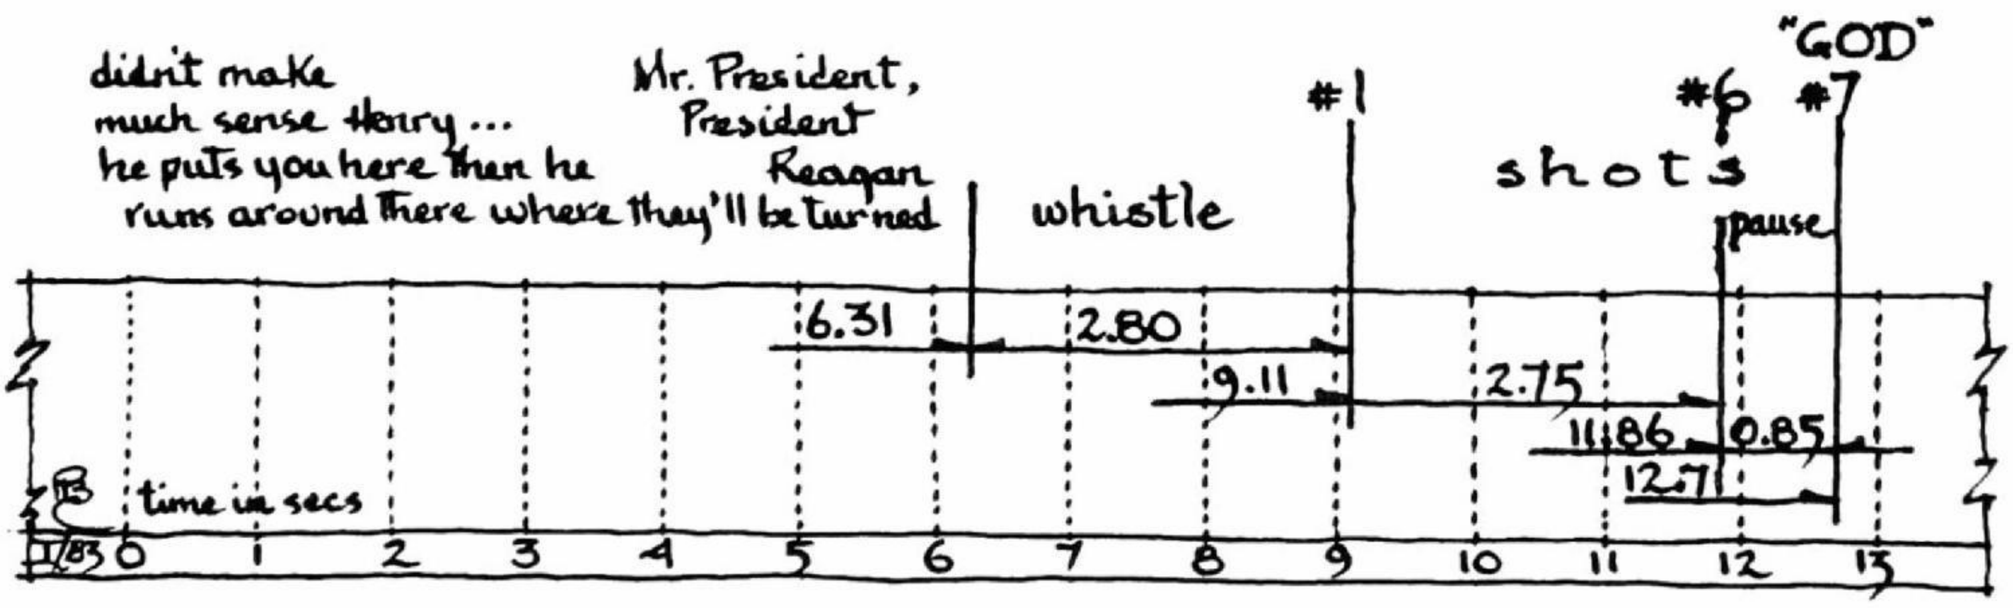
7 SHOT-SOUNDS on NBC, CBS, ABC TAPES = 6 SHOTS to FBI

On the morning of V/4/82, the first day of *U.S vs John Hinckley jr* Roger W Adelman, Assistant U S Attorney and Counsel for the Prosecution, told the jury :

> ... there are six shots ... the last one hit the President in the left chest ... the evidence will show it ricochetted off the right, rear panel of the car directly into the chest ... with six shots Mr Hinckley hit four people; that is what the videotape will will show ...

Awed by the FBI's conclusions, neither the Prosecution nor the Media bothered to listen to that videotape ... GKG asked our man in OH, S G Barber, to not only listen but file a report on that tape, part of which we impart to you forthwith :

> ... the shots are fired so rapidly that at first I counted only six shots ... the first shot is almost cut off ... it activated the AGC (automatic gain control) which then clearly records the other five ... and the 7th .. really hard to hear, but finally I heard it 0.85 secs after the 6th ... looking for a reference point so I could show others where that 7th is heard, I heard a woman cry out, "God" between the 6th and 7th shots ... very clear on NBC's * tape, she's barely audible on ABC's ... but it provided a great match-up ... a whistle, possibly a construction crew nearby, blows 2.80 secs before the 1st shot and ends just after it ... it's also heard on NBC's * and CBS's * tapes ... * kindness T W Vaughan.

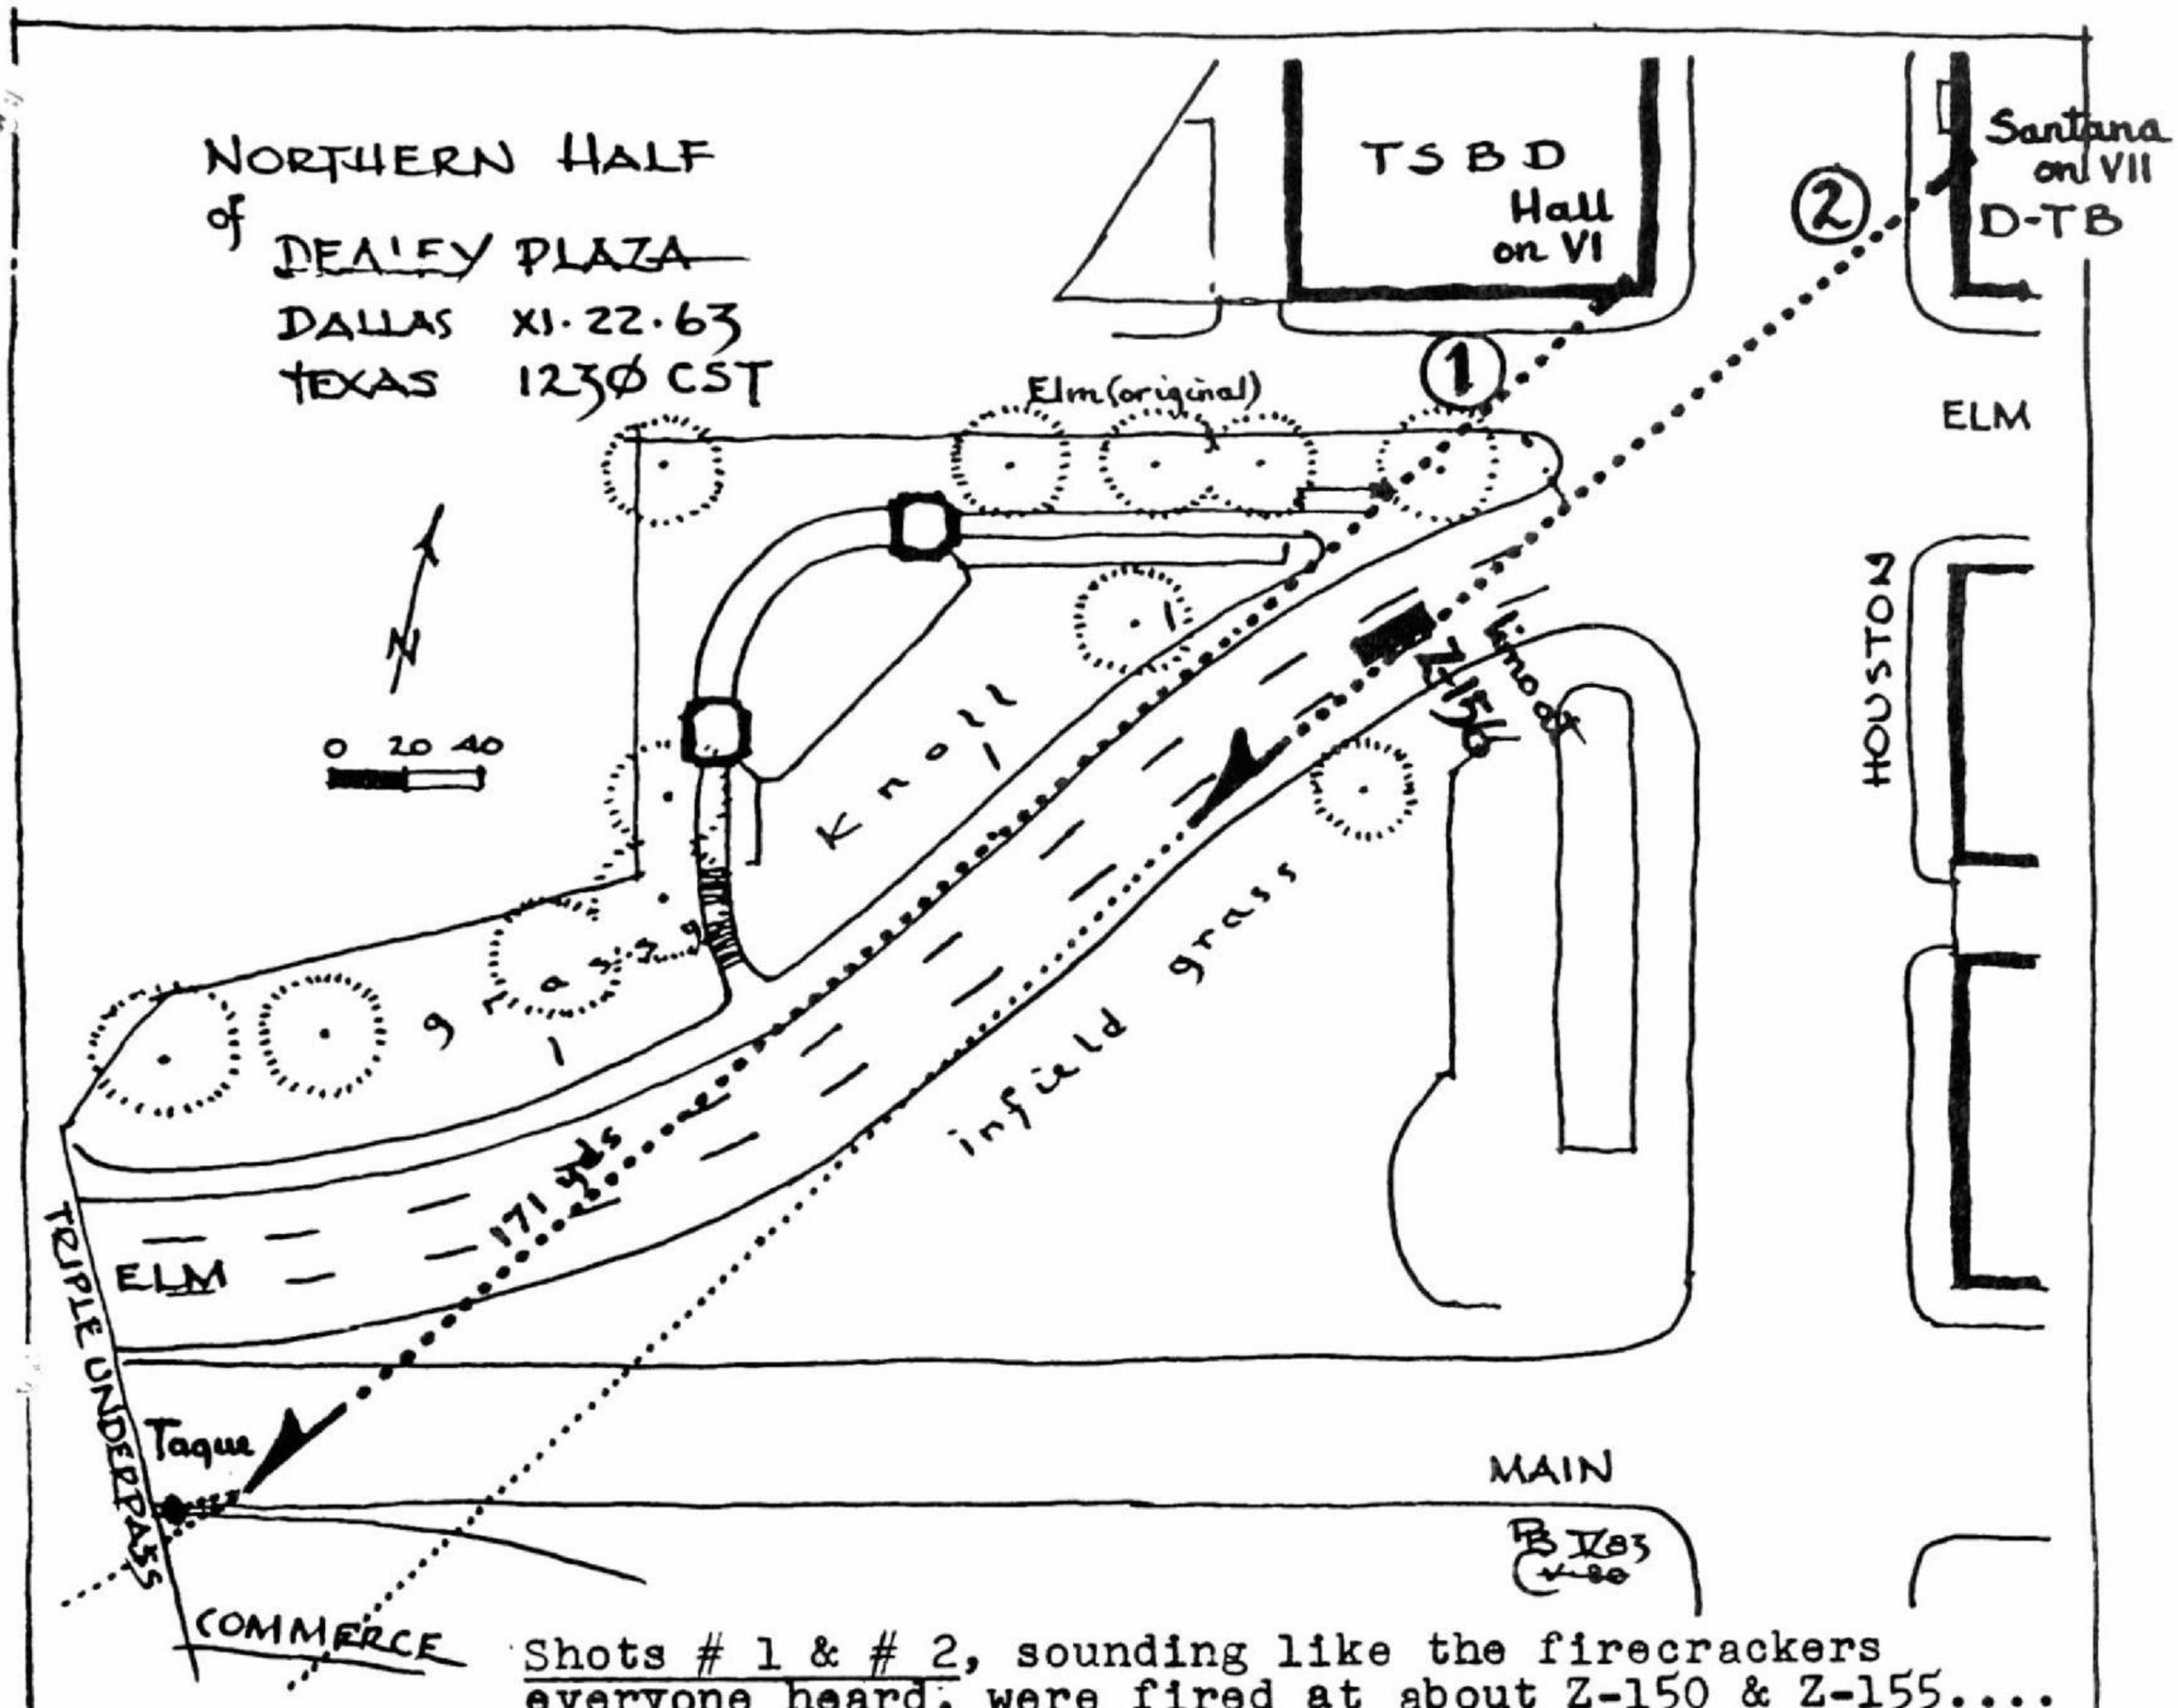


Comparing G Mack's timing of these 7 shots (TCI, VIII/81) we find his total of 2.045 secs for the 6 intervals between the 7 shot-sounds, when subtracted from Barber's total shooting time of 3.60 secs, leaves a reasonable average of .22 secs for each shot-sound ... we hope to have an acoustical engineering analysis by Spring ... it will take applied legerdemain to marry the acoustical and photographic evidence...

Meanwhile, with the President's chest wound tracking DOWNWARD and BACK to FRONT, we can forget the "balcony assassin", a waiter in the Lobby Lounge, to the left and AHEAD of the President ... and we can file the FBI's ricochetting "6th shot" in that all-too-familiar pigeon-hole : C O V E R U P ... (how much can it hold?) ... and we can correct Att'y Adelman: with six shots Mr Hinckley hit THREE people.

W H O WOUNDED THE PRESIDENT .... HINCKLEY MISSED HIM

GKG-4 · 11/83



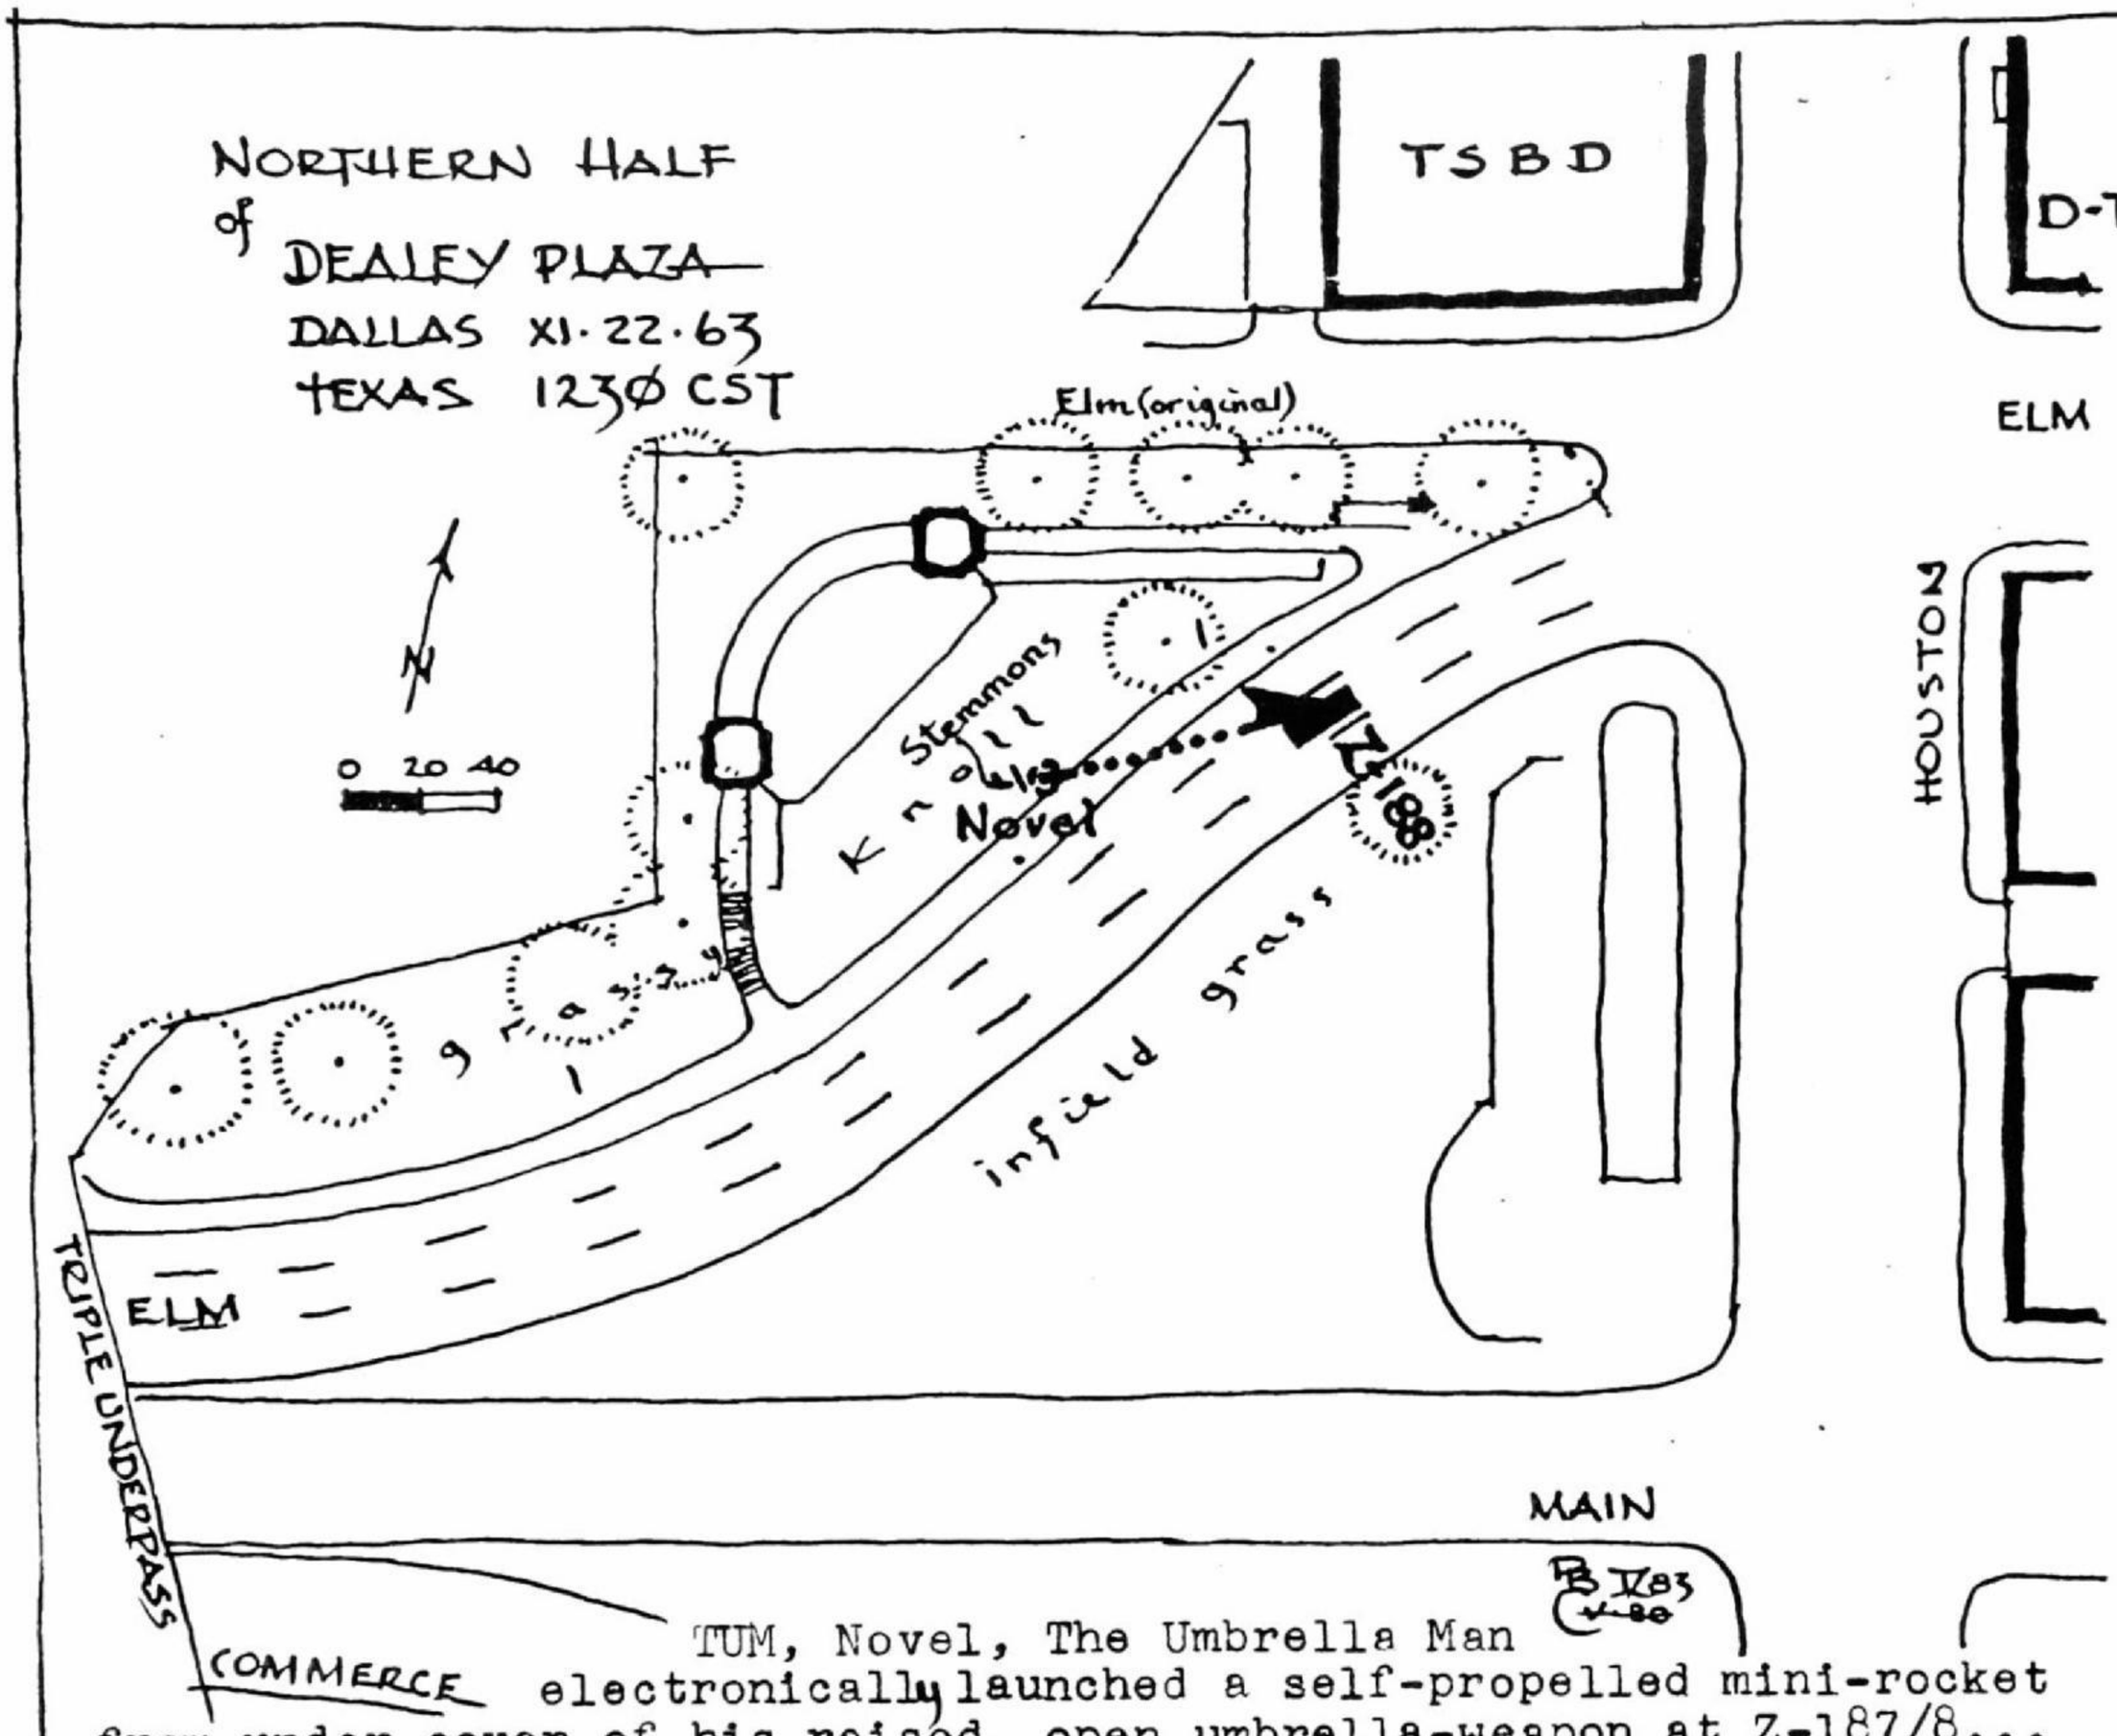
Shots # 1 & # 2, sounding like the firecrackers everyone heard, were fired at about Z-150 & Z-155.... obviously, precisely spotting two misses is impossible ... after reconstructing the firing sequence for about 11 years we have placed the two pavement scars where they fitted naturally: early on ...

At T W Vaughan's suggestion we named Hall as The Hard-Evidence Man who plants the "hot" casings, the hard-evidence, for the Dallas Police sleuths to "discover" in the "assassin's nest"in the TSBD ... Hall's country-mile miss proves his mission did not include hitting the target ... the bullet scarred Main's pavement, ricochetted off the south curb and disappeared into Commerce St's "tunnel" .. it has not yet been recovered ... bystander J Tague was nicked in the right cheek by a piece of the pavement's concrete ...

Elm's pavement scar was a miss also but not by design ... Santana, who testified he fired two shots at the motorcade from the Dal-Tex Bldg in return for immunity and safe-conduct out of the country, hit the street with his first round ... the bullet ricochetted into the RR yards where it was discovered by R H Lester in 1974.

CROSSFIRE 83 .... 1st & 2nd shots ...

GKG·5·III/83



TUM, Novel, The Umbrella Man electronically launched a self-propelled mini-rocket from under cover of his raised, open umbrella-weapon at Z-187/8...

La Flêchette had been CIA-tested accurate up to 100 meters ... at 27 yards it wounded the President in the Throat at Z-188... this was pin-pointed by R E Sprague and C B Sharrett whose research into the change of motion of the right hand from a wave to a clenched fist found this between Z-189 and Z-225 ...

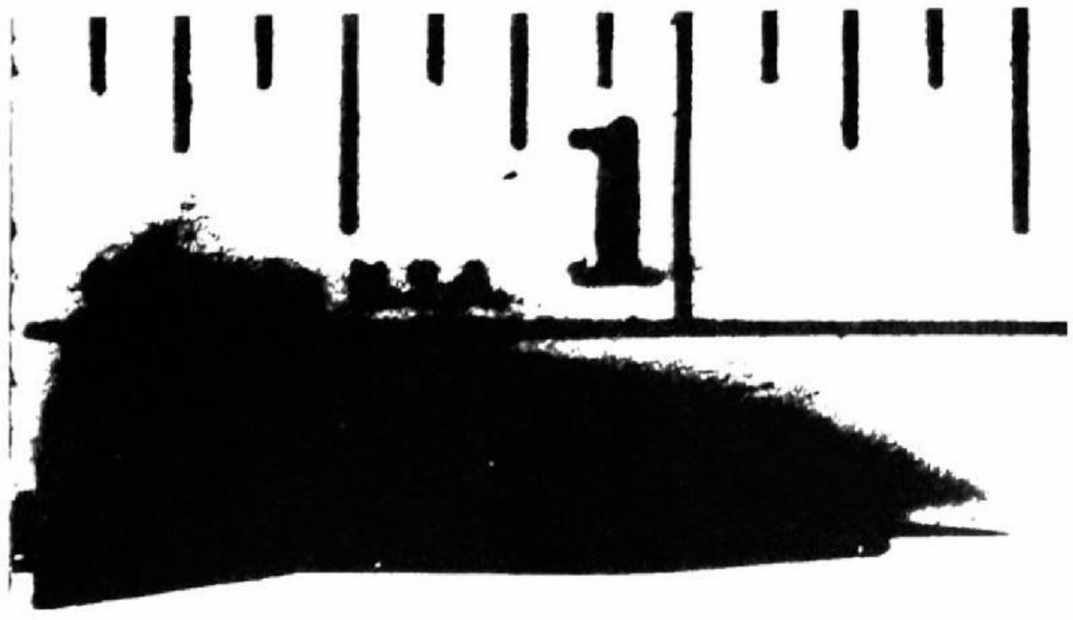


photo: G Rowell

La Flêchette is 38 mm long x 5mm in diameter ... it created the observed 4-7mm neat, round hole above the clothing line (shirt-collar) and below the Adam's Apple ... the poison in the needle nose froze the President in an upright position in less than 2 seconds (it may also have killed him) ... a sitting duck for the rifles above and behind ...

HSCA's 55 mm
removal, required to destroy hard evidence of an entrance wound, widened the Dallas wound into an irregular, gaping monstrosity, inimical to delicate Tracheostomy....

JFK's THROAT WOUND of ENTRY

GKG·7·II/83

... once Kennedy raised hell with me ... over a story Newsweek wanted to write about a new weapon being developed for Vietnam ...

Lloyd Norman, Newsweek's vacuum-cleaner Pentagon correspondent, returned to the office late one afternoon with a pocket full of small, blue, plastic flechettes ...
(ours is black)
about the diameter of a slim gigarette, sharply pointed at one end, with three or four fluted fins at the other, like a miniature missile ...

he told me, 'some colonel in the Pentagon has a drawer full of them' and simply gave him some...

We were dining with the Kennedys that night... I showed them to him, during the course of the evening, and he was fascinated at first, then appalled. 'You mean some dumb son of a bitch just handed these things to you?' ... 'Bob McNamara is in the other room with Mac Bundy ....

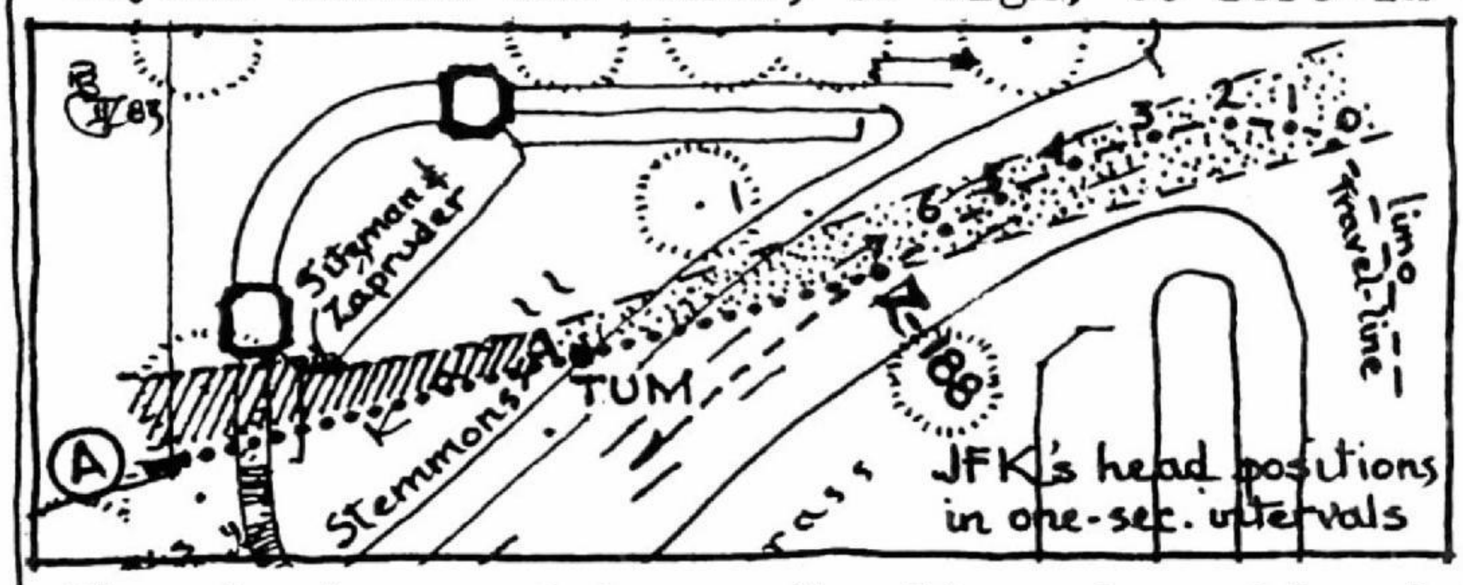
McNamara tells me those are as secret as anything going on in the Pentagon ... and he's going to find out who the hell is passing them around'...

... Norman was investigated from hell to breakfast ... (pp 155/6)

Conversations With Kennedy by Benjamin C Bradlee (Norton, NY, 1975)

The only person in Dealey Plaza who could have inflicted the THROAT WOUND of ENTRY at Z-188 is TUM, THE UMBRELLA MAN.

It is impossible to fashion this exact wound from any position behind the stockade fence ... aside from the fact the wound is not a bullet wound, as minor internal damage and lack of exit wound attest, Sitzman, steadying Zapruder on his pedestal camera perch, Stemmons roadsign plus TUM himself, and his umbrella, render it hopeless for anyone behind the fence, or sign, to zero-in on the target ...



check the diagram's hatched area, left of Stemmons.

any shot from corner-fence, (A), with no track for 7 secs, has only 1/2 sec to aim and fire.. check dotted area right of Stemmons.

The shooter must be on the limousine side of Stemmons ... he's there in Willis 5 and Bronson 1 ... he's standing on the grassy knoll, adjacent to the mid-point of the hit-zone on Elm ... he's holding a black umbrella open, over his head on a sunny, 68° day, protecting himself from the rain that stopped 2 1/2 hours ago .... suspicion being 9 points of Albert's Law, that umbrella is a covert weapon, which somehow propelled something which caused the wound of ENTRY in the President's Throat ...

L F Prouty's flêchette suggestion modified the weapon into the OFL, Overhead Flêchette Launcher ... photo-research and a little bit of luck later tagged Novel as TUM, the man in Bothun 4 sitting on the curb chatting with TA, The Accomplice, who had observed the wounding and informed the assassination's GHQ, downtown ...

Novel was identified to HSCA in '77 and '78 ... response was imaginative and without precedent in the Congress ... HSCA dredged up a Dallasite, put him on the stand and had him swear that he was The Umbrella Man in Bothun 4 and that was his umbrella on the sidewalk... the fact that he was 13 years older, 2" shorter, 10 lbs lighter , with 40% of Novel's IQ and righthanded, TUM and Novel are lefthanded, was ignored as "The Umbrella Man Theory" was laughed out the window.

Fortunately, as with all schemes, conceived in desparation and executed in coverup's disregard for the facts which display the Truth, HSCA's financed perjury is perceived for what it is : FRAUD.

With identification of Novel as TUM, it became necessary to deflect any inquiry into now-Senator Arlen Specter's original lie on which he helped build the Warren Report .... The President's Throat Wound of ENTRY is actually, believe me, actually a wound of EXIT (SIC).

Never, Never Forget : The THROAT WOUND is One of ENTRY
